(54) Title: INTEGRATED PROCESS FOR AROMATICS PRODUCTION

(57) Abstract: An aromatics complex flow scheme has been developed in which C₇-C₈ aliphatic hydrocarbons are recycled to an isomerization unit (51) of a xylene recovery zone (55) to increase the efficiency of the isomerization unit (51). This improvement results in an aromatics complex with savings on capital and utility costs and an improvement on the return on investment.
