(54) Title: SYSTEM AND METHOD FOR MOUSELESS NAVIGATION OF WEB APPLICATIONS

(57) Abstract: A method includes generating a display associated with a web-based application interface. The display includes a plurality of features. The method also includes associating each of the plurality of features with at least one first key selection. A user can navigate to one of the features using the at least one first key selection associated with the feature. The method further includes establishing at least one second key selection. The user can navigate within one of the features using the at least one second key selection. In addition, the method includes communicating the display for presentation to the user.
