

CONTROL DEVICE FOR INCINERATOR EQUIPMENT

[ABSTRACT]

5 A control device that can stabilize combustion in incinerator equipment is provided. The control device for incinerator equipment is a control device for incinerator equipment including a furnace body that carries incinerated objects while combusting the incinerated objects and a combustion air supply unit that supplies combustion air to the furnace. The control device includes a combustion air control unit
10 configured to control the combustion air before the incinerated objects are input to the furnace on the basis of the supply amount or the lower heating value of the incinerated objects supplied to the furnace.
