(54) Title: EVENT COMMUNICATION AND VERIFICATION THROUGH A BLOCKCHAIN NETWORK

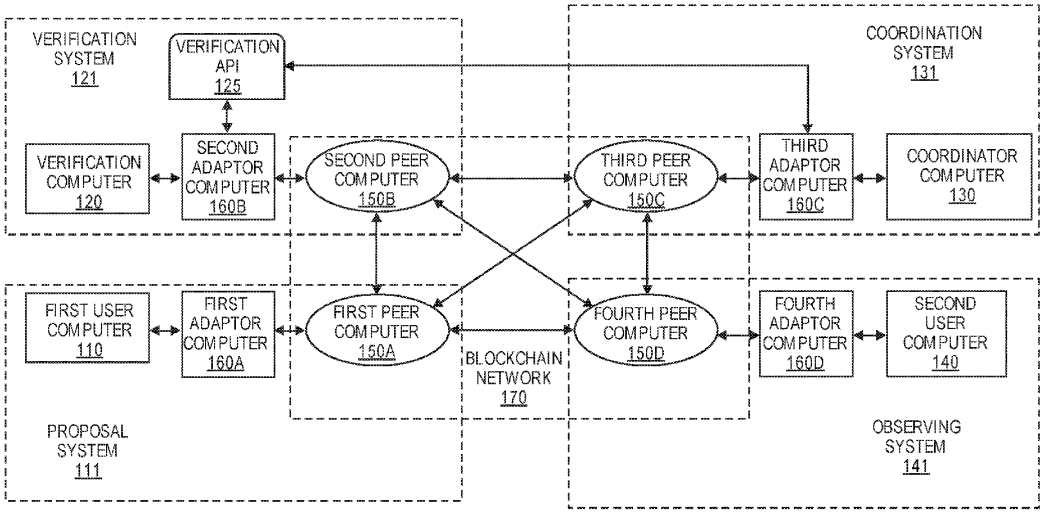

FIG. 1

(57) Abstract: A method for verifying that event can take place before the event is executed is disclosed. A verification system is incorporated into an event processing network, such that the verification system can identify newly proposed events and determine whether they can be completed. The verification system can inform the network about verification results through distributed blockchain records. Other changes in event status can also be communicated through and stored in blockchain records
