Claims

1. A liquid fragrance composition consisting of:
cyclohexylidene phenyl acetonitrile;
and a component A, which is cyclohexyl salicylate;
and a component B, which is one or more ingredients selected from the group consisting of:
6-ethyl-3-methyl-6-octen-1-ol,
dimethyl benzyl carbinol,
5,6,7-trimethyl-2,5-octadiene-4-one,
phenyl ethyl 2,2-dimethylpropanoate,
2-methyphenyl ethyl alcohol,
2-methyl-5-phenyl-pentan-1-ol,
2-methyl-4-methylene-6-phenyl-tetrahydro-2H-pyran,
diphenyl oxide,
1-hydroxy-2-(1-methyl-1-hydroxyethyl)-5-methylcyclohexane),
3-methyl-2-phenylbut-2-enenitrile,
(Z)-2-phenylhex-2-enenitrile,
benzyl alcohol, 1-hexanol,
1-heptanol,
1-octanol,
cyclohexanol,
cyclohexyl propanol,
methyl phenyl carbinol,
phenyl ethyl alcohol,
dimethyl benzyl carbinol, and,
a glycol ether.

2. A liquid fragrance composition according claim 1, herein component B is a glycol ether selected from the group of consisting of:
propylene glycol,
dipropylene glycol,
1-methoxy-2-propanol, and,
2-(2-methoxypropoxy)propan-1-ol.

3. A liquid fragrance composition according to claim 1 wherein:
cyclohexylidene phenyl acetonitrile comprises from about 40% by weight to about 95 % by weight of the liquid fragrance composition.

4. A liquid fragrance composition according to claim 1 wherein:
component A comprises from about 5% by weight to about 60% by weight of the liquid fragrance composition.

5. A liquid fragrance composition according to claim 1 wherein:
component B comprises from about 5% by weight to about 25% by weight of the liquid fragrance composition.

6. A liquid fragrance composition according to claim 1, which consists of:
about 40% by weight to about 95% by weight of cyclohexylidene phenyl acetonitrile, and,
about 5% by weight to about 60% by weight of cyclohexyl salicylate.

7. A liquid fragrance composition according to claim 1, wherein the liquid fragrance composition does not phase separate over a temperature range of – 20°C to 50 °C for a period of from one week to a period of one month.

8. A stock solution comprising a liquid fragrance composition according to claim 1.

9. A personal care product or a household care product comprising a liquid fragrance composition according to claim 1.

10. A method of rendering cyclohexylidene phenyl acetonitrile in liquid form for a period of up to 1 month at a temperature – 20°C to 50 °C, comprising the step of:
mixing cyclohexylidene phenyl acetonitrile with at least one component A ingredient with at least one component B ingredient as defined in claim 1, to thereby form a liquid mixture therefrom.

11. A liquid fragrance composition according to claim 1, wherein the component A is 3-methyl-5-phenyl-pentan-1-ol.
