

MECHANICAL PARKING LOT PALLET AND MECHANICAL PARKING LOT

{Abstract}

An object is to provide a mechanical parking lot pallet that is capable of charging a vehicle equipped with a rechargeable battery, and a mechanical parking lot with which it is possible to safely charge the rechargeable battery of the vehicle, regardless of the movement of the pallet. A mechanical parking lot pallet (2) is a mechanical parking lot pallet (2) carrying a vehicle equipped with a rechargeable battery and has a parking prohibited section (9A or 9B) that is indicated on the surface thereof and is used when a charging terminal is connected to the vehicle to charge the rechargeable battery.
