

ION GENERATION DEVICE AND ELECTRICAL DEVICE

Abstract

An ion generating device (1) includes: a discharge
5 electrode (21,22), protruding from a surface of the ion
generating device, for generating ions by electric
discharge, the discharge electrode having (i) a tip part
(31) including a brush-like electrically conductive
member and (ii) a base end part (33) to which the
10 brush-like electrically conductive member is attached,
and the base end part protruding from the surface of
the ion generating device for a length (L2) that is longer
than a length (L1) of the tip part.
