**CLAIMS**

1. A liquid solution-based pharmaceutical composition suitable for topical application to the skin and/or nails which comprises:

(a) 1 % to 35% by weight based upon the total weight of the composition of a urea-based component;

(b) 40% to 80% by weight based upon the total weight of the composition of a diol component;

(c) 1% to 20% by weight based upon the total weight of the composition of an organic acid component;

(d) 5% to 12% by weight based upon the total weight of the composition of a triol component; and

(e) an amount of an aqueous base sufficient to provide a final pH of the composition in the range of 2 to 6.

2. A composition according to Claim 1, which comprises 8% to 25% by weight of urea and/or urea peroxide.

3. A composition according to Claim 1 or 2, in which the diol component comprises propylene glycol.

4. A composition according to Claim 1, 2 or 3, which comprises 5% to 12% by weight of the organic acid component, which acid component is selected from the group formic acid, acetic acid, propionic acid, butyric acid, valeric acid, caproic acid, capryic acid, capric acid, sorbic acid, oxalic acid, hydroxybutyric acid, hydroxypropionic acids, lactic acid, glycolic acid, citric acid, malic acid, tartaric acid, malonic acid, fumaric acid, succinic acid, glutaric acid, apidic acid, pimelic acid, oxalacetic acid, phthalic acid, tartronic acid, pyruvic acid and mixtures thereof.

5. A composition according to any preceding claim, in which the organic acid component comprises lactic acid.

6. A composition according to any preceding claim, in which the triol component comprises glycerol.

7. A composition according to any preceding claim, in which the amount of aqueous base is sufficient to provide a final pH of the composition in the range of 3.5 to 4.5.

8. A composition according to any preceding claim, which comprises 2% to 5% by weight based upon the total weight of the composition of the aqueous base.

9. A composition according to Claim 8, in which the base is sodium hydroxide.

10. A composition according to any preceding claim for use in a method of treatment of a fungal infection of the nail.

11. A composition for use according to Claim 10, in which the nail disease is onychomycosis.

12. A composition for use according to Claim 10 or 11, in which the treatment comprises applying the composition in the form of a liquid or solution to an affected nail.

13. A method of improving the storage stability of a pharmaceutical composition suitable for topical application to the skin and/or nails comprising:

(a) a urea-based component;

(b) a diol component;

(c) an organic acid component; and

(d) optionally, an aqueous base, which method comprises adding between 5% and 12% by weight based upon the total weight of the composition of a triol component to that composition prior to said storage.

14. A method according to Claim 13 in which the composition is as defined in any of Claims 1 to 9.
