[Document Name] Abstract

[Abstract]

System for Disclosing Deposit Account Information that can be Virtual Currency Address Information

[Object] The object is to present a technical solution for a bank to disclose information on a deposit account directly to a third party.

[Solution Means] The owner of a virtual currency address or real-currency deposit account provides a disclosure key to a disclosee (third party). The third party accesses a disclosure server 6 by operating a disclosee terminal 7, and transmits a disclosure request with the disclosure key. The disclosure server 6 accesses to an opener bank server 1, 8, acquires the virtual currency address owner information or the instant real-currency deposit account balance information, transmits it to the disclosee terminal 7, and make it browsable on the disclosee terminal 7.
