FIG. 1

(57) Abstract: A carrier, an armrest installation unit, and a height adjustment mechanism are provided. The carrier includes a backrest assembly, a carrier frame switchable between a folded state and an expanded state, a seat assembly movably disposed on the carrier frame, and a connecting rod assembly movably connected to each of the carrier frame, the seat assembly, and the backrest assembly. The carrier frame drives the backrest assembly to fold toward the seat assembly via the connecting rod assembly when the carrier frame switches from the expanded state to the folded state.
