(54) **Title:** SYSTEM AND METHOD FOR FACILITATING RECLAMATION REQUESTS

FIG. 1

(57) **Abstract:** Described herein are systems and techniques for facilitating reclamation requests. In this disclosure, a system is described in which information related to a number of transactions is received by a service computer. The service computer may determine what transactions, or portions thereof, are eligible for reclamation and to what extent. Once eligible transactions, or portions thereof, have been identified, the service computer may identify requirements for making a reclamation request. The service computer may then identify a client device associated with the eligible transactions, generate, and transmit notifications to the client device to facilitate the submission of a reclamation request.
