(54) Title: RODENT TRAP

Fig 1

(57) Abstract: The present invention concerns a rodent trap (1) and a system or network of such traps. The trap (1) is a spring-loaded strike rat trap comprising at least one spring (2), a housing, at least one striker bar (10), at least one arming bar (20), at least one trigger plate (30) and at least one trigger (40). The spring is configured for biasing the bars moving them from one position, where the arming bar and trigger plate is releasably held by the trigger and in contact with a ready indicator (101) to indicate that the spring-loaded strike trap is armed, into at least one other position where the movement of each bar is stopped, after the spring-loaded strike trap has been triggered releasing the bars.
