(54) Title: FIREARM'S BOLT FIRING PIN LOCKING SYSTEM

(57) Abstract

An autoloading firearm having a reciprocating bolt (14), a cocking lever and firing pin (24) which bolt (14) and firing pin (24) are locked by a locking lever (31) until the trigger (17) is pulled on until the cocking lever of the bolt (14) is manually pulled back. A linkage operably controlled by the trigger (17) causes the locking lever (31) to unlock the bolt (14) and firing pin (24) when the trigger (17) is pulled.
