

ABSTRACT

The present invention relates to a method, apparatus, device and a storage medium for processing interactive information. According to one example of the processing method, a proxy server receives interactive information issued by a first device in a predetermined topic, and stores the interactive information to a storage path corresponding to the predetermined topic. Then, in response to that a second device which subscribes to the predetermined topic is online, the proxy server reads the interactive information from the storage path corresponding to the predetermined topic, and sends the read interactive information to the second device. Wherein, the first device and the second device respectively indicate the one and the other one of a cloud server and a terminal device.
