

CHANNEL STATE INFORMATION REPORTING METHOD, USER EQUIPMENT, NETWORK DEVICE, AND STORAGE MEDIUM

ABSTRACT

Provided in the present application are a channel state information reporting method, a user equipment, a network device, and a storage medium. The method comprises: receiving configuration information about channel state information (CSI) transmitted by a network device and, on the basis of the configuration information, determining CSI of a first type and CSI of a second type; and reporting the CSI of a first type and the CSI of a second type to the network device.
