

Abstract

Thiazolidinones of general formula I

(I),

in which Q, A, B, X, R¹ and R² have the meanings that are indicated in the description, as well as those of general formula IA

in which Q, A, B, X, R¹ and R^{2a} have the meanings that are indicated in the description, their production and use as inhibitors of the polo-like kinase (PLK) for treating various diseases as well as intermediate products for the production of thiazolidinones are described.
