(54) Title: SYSTEM AND METHOD FOR NAVIGATING SEARCH RESULTS

(57) Abstract: A method for navigating search results includes identifying a first occurrence and a second occurrence of at least one search term in a document. The method also includes generating a web page comprising at least a portion of the document.The first occurrence appears as a hyperlink in the web page. The hyperlink is associated with a position of the second occurrence. The method further includes communicating the web page for display to a user.
