- (54) **Title:** ELECTRICAL OUTLET

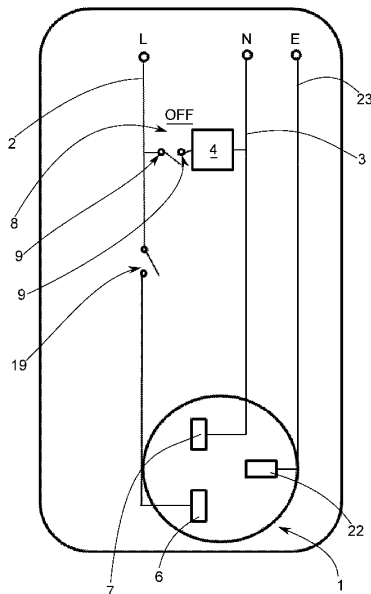

FIG. 22

- (57) **Abstract:** An electrical outlet comprising: -one socket module (1), -one live line (2) suitable for being connected to a power supply via a live pole (L) and, -one neutral line (3) suitable for being connected to said power supply via a neutral pole (N), -one additional electronic module such as a USB socket module (4), said one socket module (1) comprising a live electrical connector (6) electrically connected to said live line (2) and a neutral electrical connector (7) electrically connected to said neutral line (3), said additional electronic module being electrically connected in parallel to said socket module (1) between said live line (2) and said neutral line (3), said electrical outlet being characterized in that it comprises one first switch (8) connected in series to said additional electronic module arranged so as to electrically connect or disconnect said additional electronic module and said socket module (1) from each other respectively when deactivating or activating said first switch (8).
