(54) Title: CHILD SAFETY SEAT

FIG. 1

(57) Abstract: A child safety seat includes a seat shell having an upright support surface including a first side and a second side. A first upright side member is arranged at the first side and extends forward from the upright support surface. A second upright side member is arranged at the second side and extends forward from the upright support surface. An upright support cavity for receiving an upper body of a child is defined between the upright support surface, the first upright side member and the second upright side member. At least one armrest is located within the upright support cavity.
