(54) Title: METHOD FOR LINKING A BIOLOGICAL SAMPLE IN A COLLECTION AND/OR INFORMATION RELATED TO A BIOLOGICAL SAMPLE IN A COLLECTION WITH INFORMATION FROM THE DONOR THAT BIOLOGICAL SAMPLE

(57) Abstract: The present invention relates to a method for linking a biological sample in a collection and/or information related to a biological sample in collection with information from the donor of that biological sample, comprising: the public request or call for information from the donors of the biological samples; the determination of one or more biological characteristics of a donor responding to the request or call; the submission to a keeper or a proprietor of the collection of the determined biological characteristics of the responding donor together with the information from the donor; the comparison of the determined biological characteristics of the responding donor with the corresponding biological characteristics of the biological samples in order to identify the biological sample of the responding donor and/or information related thereto; and the linking of the information of the responding donor with his or her biological sample and/or the information related to that sample.
