(54) Title: METHOD AND DEVICE FOR DETERMINING RESOURCES AND STORAGE MEDIUM

UE receives a first message over a first cell, wherein the first message is used
for determining M first bandwidth parts (BWPs) in a second cell, M is an
integer greater than or equal to 1, each of the M first BWPs is smaller than or
equal to a bandwidth of the second cell; one or more transmission resources
for the UE in the second cell is within at least one of the M first BWPs.

101

FIG. 1

(57) Abstract: Provided is a method and device for determining resources and a storage medium. In the method, a user equipment (UE) receives a first message over a first cell. The first message is used for determining M first bandwidth parts (BWPs) in a second cell, M is an integer greater than or equal to 1, each of the M first BWPs is smaller than or equal to a bandwidth of the second cell. One or more transmission resources for the UE in the second cell is within at least one of the M first BWPs.
