a multi-sided stepped body with a cavity therein; and

a plug received in the cavity locking a net node in the cavity and securing the hard point to the net node in a pivotable fashion.

20. The system of claim 19 in which the net mesh is between 110 and 190 mm.

21. The system of claim 19 in which the hard point has a cylindrical portion.

22. The system of claim 19 in which the cylindrical portion extends from a front face of the hard point.

23. The system of claim ~~1~~ 19 in which the hard point body has eight sides.

24. The system of claim 23 in which four sides include slots receiving net lines therein.

25. The system of claim ~~1~~ 19 in which the hard point has a length to diameter ratio of approximately 1.
