

ABSTRACT

SYSTEM, INFORMATION PROCESSING DEVICE, INFORMATION
PROCESSING METHOD, AND STORAGE MEDIUM

Second position information is identified from a plurality of pieces of position information of a terminal device. The plurality of pieces of position information are obtained via a position information obtainer before first position information of the terminal device. The first position information is obtained via the position information obtainer. The second position information is used for correcting the first position information. The first position information is corrected based on the identified second position information.
