

【ABSTRACT】

Disclosed are a particle-shaped hair thickening composition for external appearance, and a method for preparing the particle-shaped hair thickening composition for external appearance. The composition has effects of being
5 discharged through a puff-shaped discharge hole by comprising small particles formed by having a high-specific gravity powder, and enabling elaborate and natural styling by being applied to thinning hair parts through direct tapping. In addition, the composition has effects of excellent adhesion and water resistance when applied.
