

ABSTRACT

MULTI-HERBAL MEDICINAL COMPOSITE FOR TREATING THE METABOLIC SYNDROME AND PREPARATION METHOD THEREOF

The present invention discloses a multi-herbal medicinal composite for treating the metabolic syndrome and a preparation method thereof. The multi-herbal medicinal composite comprises *Bidens pilosa* and *Panax ginseng* and has the effects of promoting insulin secretion as well as synthesis and reducing insulin resistance so as to regulate blood glucose level, thereby providing an appropriate treatment for diabetic patients.
