(54) Title: SYSTEM AND METHOD USING NEURAL NETWORKS FOR REAL-TIME BUSINESS INTELLIGENCE AND AUTOMATION CONTROL

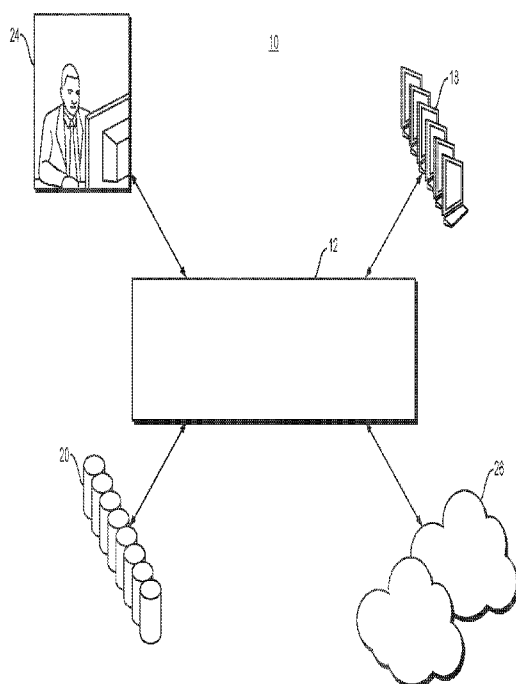

FIG. 1

(57) Abstract: A system and integration infrastructure to provide a distributed matrix or neural network of connected real-time decision support modules designed to perform business intelligence evaluations in real time. The system and integration infrastructure provide a network of intelligence superimposed upon any company's existing IT data centers and cloud computing connections. The system is highly customizable to the unique business model deployed by the client company within the best practices of the client company's industry.
