

ELECTRONIC DEVICE, METHOD, AND STORAGE MEDIUM FOR
GENERATING IMAGE

【ABSTRACT】

Provided are an electronic device, a method, and a storage medium for generating
5 an image. The method for generating an image includes an operation of receiving a second
drawing input around an object included in an image. The method identifies attributes of
the object when the second drawing input is determined as a control command on the
basis of the object and the second drawing input. The method generates a first preliminary
object image on the basis of the attributes of the identified object. The method provides
10 the generated first preliminary object image.
