

Packaging Apparatus for Disc Cartridge

ABSTRACT

The present invention provides a packaging apparatus for packaging caddy or disc
5 cartridge. The packaging apparatus comprises a conveying rail where the caddy is
conveyed along the rail during packaging; a vacuum nozzle mounted on a sliding arm; a
bag sealer for handling and sealing a bag for containing the caddy, the bag sealer
comprises grippers and a heat sealer, wherein the grippers extended into edges of opened
end of the bag and operationally lifts the bag to open the opened end of the bag for
10 receiving the caddy, and seals the opened end with the heat sealer; and a folder for folding
side seams and corner folds of the bag vacuum packed with caddy.
