- (54) **Title:** METHODS, DEVICES, AND COMPUTER READABLE STORAGE MEDIUM FOR COMMUNICATION

FIG. 8A

- (57) **Abstract:** Example embodiments relate to methods, devices and a computer readable storage medium for communication. In an example method, a first terminal device assigns a first subset of blocks in a set of blocks of a block-based time structure to a second device or a set of devices including the second device; and transmits to the second device, an indication message indicating that the first subset of blocks are assigned to the second device or the set of devices. This way, the power waste can be avoided for the second device in listening to all the blocks.
