

METHOD AND APPARATUS FOR COLLABORATIVE
INFORMATION MANAGEMENT

5

ABSTRACT

10 The present invention provides an apparatus for managing
and displaying information stored on one or more computers,
the information comprising one or more information entries
each associated with one or more user groups, the apparatus
including: selection means for selecting one or more of the
groups; display means for displaying the information
15 entries associated with the selected groups; wherein the
selection means is operable by a user to select groups of
which the user is a member, and the apparatus is configured
to respond to the selection by displaying the information
associated with the selected groups. The invention also
20 provides a method of managing and displaying such
information, including: selecting one or more of the groups
of which a user is a member; displaying the information
entries associated with the selected groups; whereby
information associated with the selected groups is
25 displayed.
