BASE STATION FOR USE IN MULTI-NETWORK CONNECTION COMMUNICATION SYSTEM AND ITS CONNECTING METHOD

ABSTRACT OF THE DISCLOSURE

A base station for use in a multi-network connection communication system and its connecting method are provided, wherein the base station is connectable simultaneously to a carrier network and a private network. The base station comprises a section for making a decision as to whether a terminal is to be connected to a carrier network or a private network, and a section for connecting the terminal to the carrier network or the private network in accordance with the decision result.
