

ABSTRACT

Embodiments of the present disclosure disclose a measurement report reporting method and device, which can be applied to systems such as Internet of vehicles, V2X and V2V. The method is performed by a first terminal, and comprises: obtaining a sidelink discovery reference signal received power (SD-RSRP) and a sidelink reference signal received power (SL-RSRP); and according to the SD-RSRP and the SL-RSRP, determining to send a measurement report to a base station. By implementing the embodiments of the present disclosure, the measurement report can be accurately reported.
