(54) Title: IMPROVEMENTS IN SEALING APPARATUS

(57) Abstract: An apparatus is provided for sealing of a damaged inflatable article, the apparatus including a container (1) for a sealant compound or composition, the container including at least one inlet means (4) which is releasably attachable to a source of pressurised air/gas, an extraction assembly (10) associated with the container (1), the extraction assembly including an extraction unit having at least one outlet means (18) to be releasably coupled with or connected to the article and means (30) to be disposed within the container (1) and actuatable, upon supply of pressurised air/fluid/gas to the container (1) to allow for controlled dispensing of the sealant compound or composition from the container (1) via the extraction unit (10) to the article to be sealed.
