

Nucleated polyoxymethylene molding compositions

Abstract

5

Thermoplastic molding compositions comprise

- A) from 20 to 99.9% by weight of a polyoxymethylene homo- or
copolymer,
- 10 B) from 0.0001 to 1.0% by weight of a nucleating agent which
differs from C),
- C) from 0.001 to 5% by weight of a melamine-formaldehyde
15 condensate, and
- D) from 0 to 70% by weight of other additives,
- where the sum of the percentages by weight of components A) to D)
20 is always 100%.
