

Process for producing medicaments which comprise HMG CoA reductase inhibitors

A b s t r a c t

The invention relates to a process for producing medicaments which comprise HMG CoA reductase inhibitors in the form of their salts, characterized in that the corresponding precursors of the actual active compounds are converted with bases, which contain alkali metal or alkaline earth metal ions, in a solvent, into the active compound, and the resulting active compound-containing solution is processed into the desired administration form.
