

ABSTRACT OF THE DISCLOSURE
DATA DISTRIBUTION SYSTEM,
DATA BUSINESS GATEWAY SYSTEM

FOR IMPLEMENTING THE DATA DISTRIBUTION SYSTEM, AND

5

DATA DISTRIBUTION METHOD

A data distribution system is provided in which plural systems participate and can trade data openly. Also, a data business gateway system with a junction function to enable
10 liberalization of interactive data distribution between plural companies and promote data distribution is provided.

Gateway means with a data junction function is configured in which closed data supplied from a service company system and open data supplied from an open system are imported and
15 imported data is normalized and managed, and if there is a request for access to data from a data receiving party, a decision is made as to whether or not to disclose normalized data and blended or mixed data thereof to the access requesting party and if it is decided that the data is
20 disclosable, searched/extracted data is supplied so that liberalization of data distribution is promoted.
