

Spinning Reel for Fishing

[Document Name] Abstract

[Abstract]

[Object] To provide a spinning reel for fishing assembled with a one-way clutch, with a structure that enables reduction in the size and weight of a reel body.

[Solution] A spinning reel for fishing according to the present invention includes: a reel body; a handle that is rotatably supported on the reel body; a drive shaft that is rotated by rotating operation of the handle; a one-way clutch 20 that is disposed on the drive shaft and includes an inner ring 21, an outer ring 27 and a retainer 23 retaining a plurality of rolling members 25; and a cylinder portion 2C that is formed on the reel body and houses the one-way clutch 20. The outer ring 27 is provided with a detent 27 protruding radially outwardly; the cylinder portion 2C is provided with a notch 2c that radially penetrates its circumferential wall 2a; and the detent 27c of the outer ring 27 is disposed in the notch 2c in such a manner that it is radially exposed in order to fix the outer ring 27 in a detented manner.
