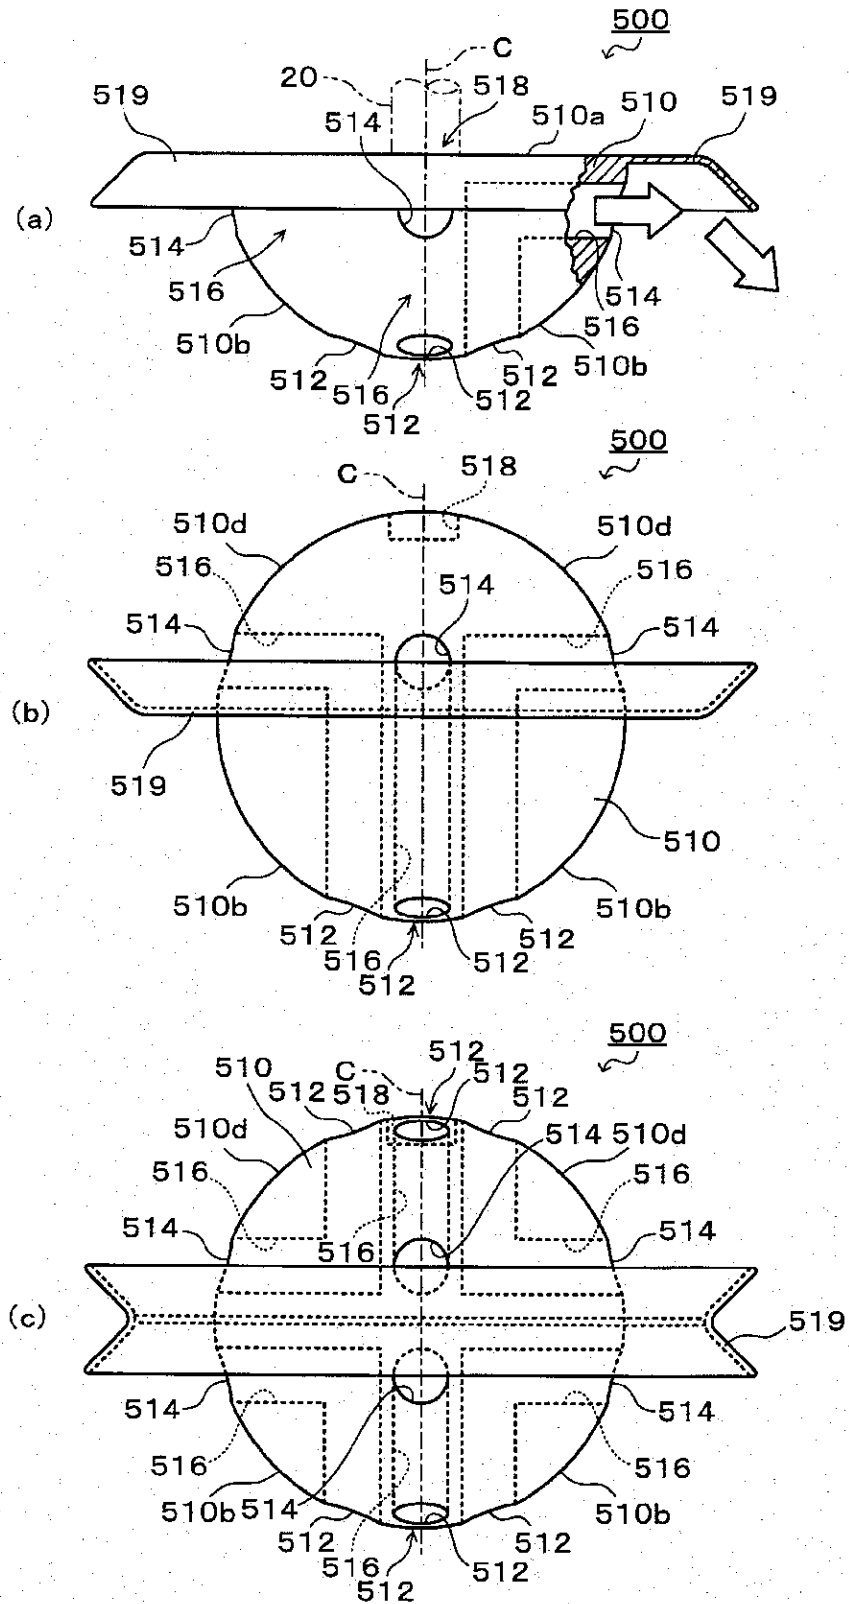

Figure 49

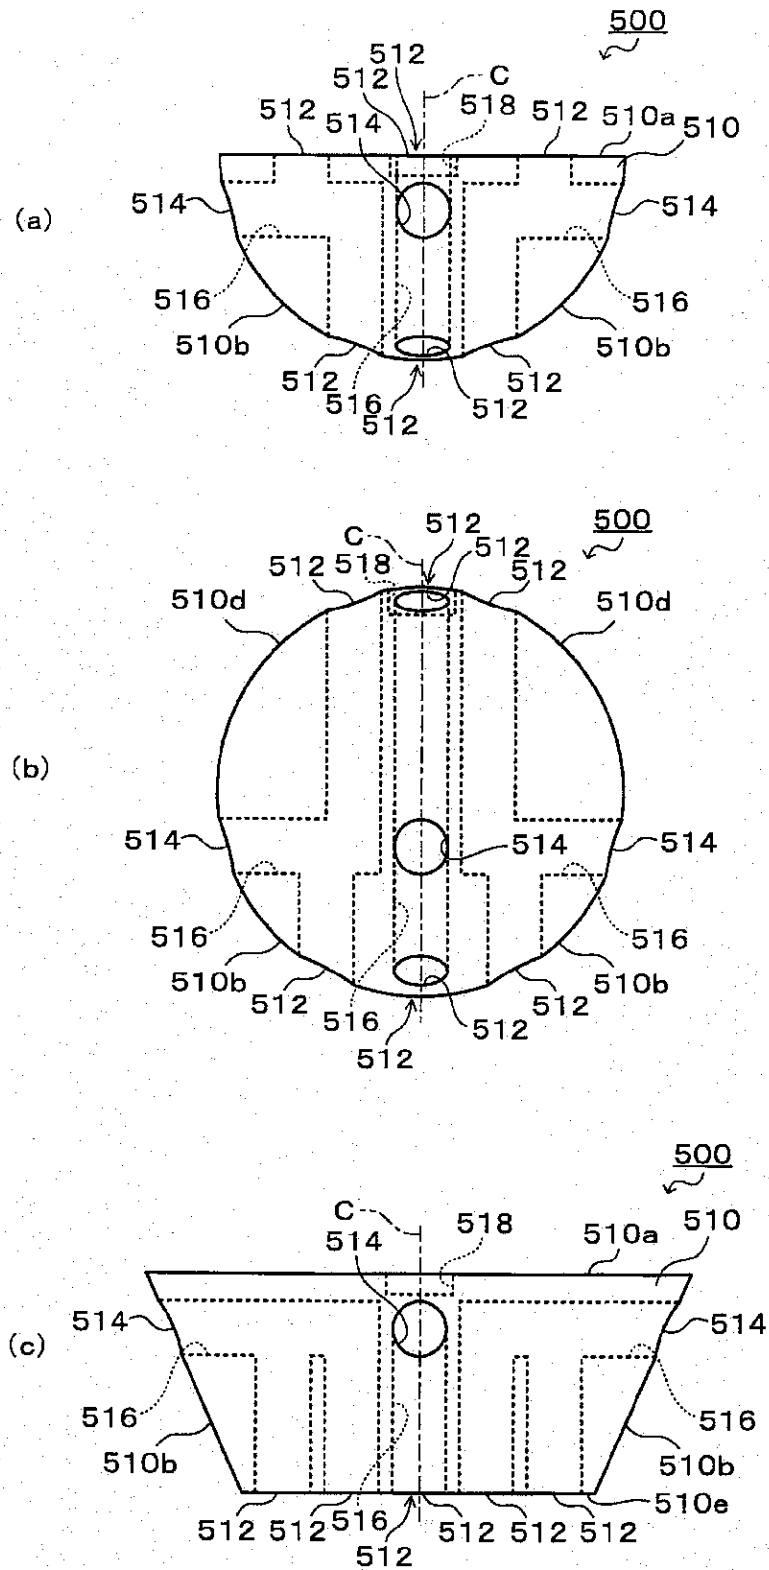

Figure 1 consists of three schematic cross-sectional views, (a), (b), and (c), of a wellbore system 500. In all views, a wellbore 20 is shown with a central tube 22 and a lower section 24. The wellbore is surrounded by a formation 510, which is divided into zones 510a and 510b. Arrows indicate fluid flow from the wellbore into the surrounding formation. In view (a), the wellbore 20 is shown with a central tube 22 and a lower section 24. The wellbore is surrounded by a formation 510, which is divided into zones 510a and 510b. Arrows indicate fluid flow from the wellbore into the surrounding formation. In view (b), the wellbore 20 is shown with a central tube 22 and a lower section 24. The wellbore is surrounded by a formation 510, which is divided into zones 510a and 510b. Arrows indicate fluid flow from the wellbore into the surrounding formation. In view (c), the wellbore 20 is shown with a central tube 22 and a lower section 24. The wellbore is surrounded by a formation 510, which is divided into zones 510a and 510b. Arrows indicate fluid flow from the wellbore into the surrounding formation.
