

ABSTRACT

METHOD AND DEVICE FOR SEPARATING

A SCREEN ON A FLAT SCREEN TEXTILE PRINTING MACHINE

When a color paste is squeegeed by a squeegee
5 in printing the fabric by a flat screen textile printing
machine, a screen is separated from the surface of the
fabric by raising a screen frame at the side of start of
squeegee travel at the same time as, or with a slight
time lag after, the start of squeegeeing, while
10 squeegeeing is carried out.
