ABSTRACT

MANAGEMENT SYSTEM OF GAMING CHIPS AND STORAGE BOX

A system that managing playing cards (4) to which information is given by an RFID tag (306) and gaming chips (3) to which information is given by an RFID tag (125). A system (500) is provided with a storage box (200) integrally configured to contain a card drawer (220) for storing playing cards (4) and a chip drawer (210) for storing gaming chips (3), a card RFID reader(601) for reading information of an RFID tag (304) attached to the playing cards (4) stored in the card drawer (220), and a chip RFID reader (701) for reading information of the RFID tag (125) attached storing gaming chips (3) stored in the chip drawer (210). A card RFID reader (601) and a chip RFID reader (701) read information of each RFID tag (306,125) using different frequencies.
