(54) Title: ELECTRONIC SCORING SYSTEM FOR COMBAT SPORTS

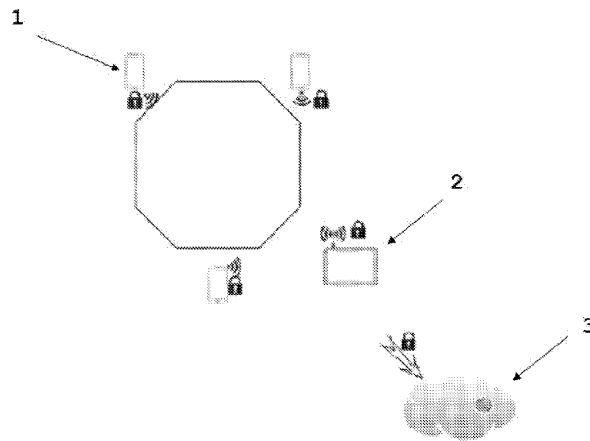

Figure 1

(57) Abstract: The present application describes an electronic scoring system, especially designed for combat sports. The system allows a judge to automatically and consistently record the scoring parameters throughout a combat and its various rounds. In order for this to be possible, the judge's evaluation is captured periodically, during the combat, using a scoring device and is sent to a central control unit, which is in charge of all the processing underlying the determination of the final winner of the combat.
