

ABSTRACT

LAYERED SHEETS AND PROCESSES FOR PRODUCING THE SAME

It is an object of a first aspect of the invention to provide a process for extremely easily producing a layered sheet which has a holding surface having high surface accuracy. It is an object of a second aspect of the invention to provide a process for extremely easily producing a layered sheet which has a holding surface having high surface accuracy and has the excellent property of adsorptively holding a material to be polished. It is an object of a third aspect of the invention to provide a layered sheet which has a holding surface having surface accuracy and has the excellent property of adsorptively holding a material to be polished, and a process for producing the same. It is an object of a fourth aspect of the invention to provide a layered sheet which has the excellent property of adsorptively holding a material to be polished and has excellent durability. Each of the layered sheets of the present invention comprises a base material sheet and a polyurethane foamed layer.
