

Figure 1 Hydrolysis of Compound 16 at pH 7.9, 25° C, showing vinylic region, initial time points.

Figure 2 Hydrolysis of Compound 16 at pH 7.9, 25° C, showing vinylic region, later time points.

Figure 3 Hydrolysis of Compound 16 at pH 7.9, 25° C, showing aliphatic region, later time points.

Figure 4 Hydrolysis of Reference Compound A at pH 7.9, 37° C, showing vinylic region .

Figure 5 Hydrolysis of Reference Compound A at pH 7.9, 37° C, showing aliphatic region (water peak at 4.8 ppm removed for clarity).
