

MOLDING DIE, RESIN MOLDING APPARATUS, AND METHOD FOR
PRODUCING A RESIN MOLDED PRODUCT

ABSTRACT OF THE DISCLOSURE

5 The present invention provides a molding die capable of enlarging a region to be resin-molded in an object to be molded. The molding die of the present invention includes an upper die 100 and a lower die 200, the upper die 100 is capable of adsorbing an object to be molded, the lower die 200 includes a lower die bottom member 202, a lower die side member 201, and molding object drop prevention block 211, a lower die
10 cavity 203 is formed by a space surrounded by the lower die bottom member 202 and the lower die side member 201, and the molding object drop prevention block 211 is provided on a part of an end portion of the lower die side member 201 facing the lower die cavity 203 and is movable up and down.
