

ABSTRACT

5 A first embodiment of a method for producing water-absorbent resin particles includes a polymerization step of polymerizing a monomer on at least a part of a surface of a surface-crosslinked polymer particle to obtain a polymer. A second embodiment of a method for producing water-absorbent resin particles includes a polymerization step of polymerizing a monomer on at least a part of a surface of a non-surface-crosslinked polymer particle in the presence of a crosslinking agent to obtain a polymer.
