(54) Title: CLEANER HEAD MEMBER, CLEANER HEAD ASSEMBLY AND WET CLEANING APPARATUS

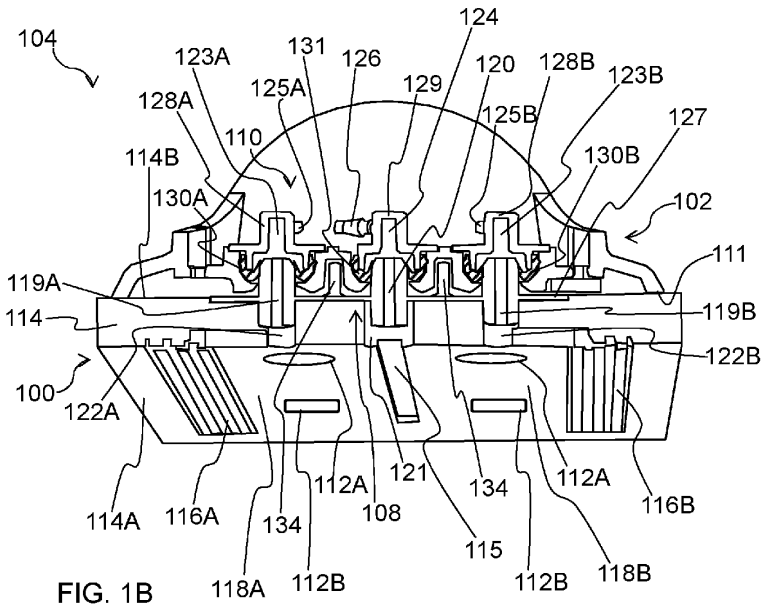

FIG. 1B

(57) Abstract: Provided is a cleaner head member (100) for attaching to and/or detaching from a cleaner head (102) of a wet cleaning apparatus. The cleaner head member comprises a cleaning liquid outlet structure (115) for delivering cleaning liquid towards a surface to be cleaned, and a dirt inlet structure (116A, 116B) for receiving dirty liquid from the surface to be cleaned. The cleaner head member further comprises a connector (108) for connecting to a complementary connector (110) of the cleaner head. The connector comprises at least one dirt channel (119A, 119B) for transporting the dirty liquid away from the dirt inlet structure, and at least one cleaning liquid channel (120) for supplying the cleaning liquid towards the cleaning liquid outlet structure. Each of the at least one cleaning liquid channel is, for example, separate from each of the at least one dirt channel in the connector, such that the cleaning liquid and the dirty liquid cannot mix within the connector. Additionally provided is a cleaner head assembly (104) comprising the cleaner head member
