(54) Title: BASE, HOLDING MECHANISM, CROTCH BELT BUCKLE RECEIVING DEVICE, AND CHILD SAFETY SEAT

(57) Abstract: The present disclosure discloses a base, a holding mechanism, a crotch belt buckle receiving device and a child safety seat. The base is used for a child safety seat, and includes: a housing forming an appearance of the base; a base bracket accommodated in the housing; and an anchor assembly telescopically and pivotably connected to the base bracket and at least partially extending out of the housing. The holding mechanism enables a headrest to lean forward when being impacted by an external force. The crotch belt buckle receiving device is arranged in a seat portion of a seat body of the child safety seat. The child safety seat includes a seat body and a headrest. The base and the child safety seat provided by the present disclosure have good safety and convenient operation.
