WO 2011/075786 A1

(54) **Title**: IMMUNO-CONJUGATES AND METHODS FOR PRODUCING THEM 2

(57) **Abstract**: The present invention provides an isolated protein comprising an immunoglobulin variable region comprising at least two cysteine residues positioned within framework region (FR) 2 and/or at least two cysteine residues positioned within framework region (FR3), wherein if at least two of the cysteine residues in FR2 and/or FR3 are not conjugated to a compound then an intra-framework disulphide bond is capable of forming between the cysteine residues. Preferably the protein comprises an immunoglobulin heavy chain variable region (V_H) and an immunoglobulin light chain variable region (V_L), wherein at least one of the variable regions comprises the two cysteine residues. The present invention also provides conjugates of the protein and another compound.
