

ABSTRACT

The present invention provides an information display method and system in analyte testing, a medium, and a device. The method includes: instruction obtaining: obtaining an operation instruction from a user, where the operation instruction includes
5 a testing instruction and a statistical instruction; first displaying: when the operation instruction is the testing instruction, starting a testing process of an analyte testing system and displaying a name of a process being performed on a display, and after the testing process is completed, displaying a test result and a preset reference range of an analyte on the display; and second displaying: when the operation instruction is the
10 statistical instruction, obtaining historical test results from a memory of the analyte testing system, processing the obtained historical test results into a chart form, and displaying a chart on the display.
