IN VIVO DENDRITIC CELL THERAPEUTIC ADJUVANT

ABSTRACT

Disclosed is a method of eliciting an immune response to an antigen present endogenously in a mammal. The method may comprise administering to the mammal a composition comprising at least one immunomodulator for inducing cell differentiation and.or antigen-presenting function of antigen-presenting cell precursor. The antigen-presenting cell precursor may have taken up the antigen. Also disclosed are a composition for use in the method, an adjuvant comprising the composition, the use of the composition and the immunomodulator as described herein.
